

Beyond Transition? Long-Term Political Development in Eastern Europe (1989–2025)

19.02.2026 / 16:00–18:15 CET/ Online via [Zoom](#)

More than three decades after the transformative years of 1989/1991, Eastern Europe presents a striking diversity of political trajectories. This workshop revisits foundational questions of post-communist political development, moving beyond early transition paradigms and examining long-term processes shaped by external conditionality, historical path dependencies, domestic agency, and political creativity.

*The workshop is based on the recent volume: *Die politischen Systeme im östlichen Europa: Institutionen, Akteure und Prozesse* (Springer, 2025), edited by Sonja Priebus and Timm Beichelt.*
