Viadrinum is an annual summer school at the European University Viadrina in Frankfurt (Oder), devoted to the countries of the Eastern Partnership and the larger context of Central and Eastern Europe. Building on the discussions around the notion of learning city during the previous editions, in 2025 the school will focus on the ruptures in the urban fabric, both as the effects of (historical) negligence and abandonment, and as the traces of emancipatory disruptions in the established order of things.

It invites students, young researchers, civil society activists, artists and cultural workers to critically interrogate the (institutional) foundations of the city as a contested entity in-the-making, shaped by regimes of urban planning and governance, property relations and dwelling practices. Guided by the spirit of tactical urbanism and participatory pedagogics, the school will look into the ways how alternative futures (re-)emerge through the (invisible) cracks of the city, aided by contingent spatial imaginations and the acts of collective un-/inter-weaving.
